Subject: Application for Senior Expert BI DevOps INC Management (Job-ID: 280160)

Dear Mr. Smith Jonas,

I am applying for the Senior Expert BI DevOps INC Management role at Vodafone GmbH, identified via the Vodafone internal career portal. With 15+ years of experience within Vodafone and global organizations, I am motivated to contribute to BI operations excellence in Germany.

I currently lead a team of 30 engineers, reducing incidents by 11% through automation-driven DevOps practices and improving SLA performance by 7%. I have strengthened MTTR through RCA governance and managed ETL/data platforms (Teradata, Ab Initio), delivering large-scale transformations including 30,000+ job migrations and ~€350K savings.

My expertise in SRE, DevOps, GCP, ETL, SQL/Python, and incident management aligns with Vodafone's focus on innovation, customer-centricity, and operational excellence. I have driven measurable outcomes through automation, compliance, and governance while fostering collaboration across cross-functional teams and aligning with organisational goals of efficiency and reliability.

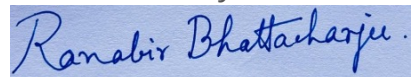

I am eager to strengthen BI operations and DevOps maturity at Vodafone Germany, delivering continuous improvement and measurable impact from day one. I would welcome the opportunity to discuss my application and am available for a phone or personal interview.

Enclosure:

– CV

– Experience Certificates

Yours sincerely

Ranabir Bhattacharjee
